AREA 1

ACADEMIA AND THE ARTS

Area I embraces instruction in the performing arts of choral music, drama and instrumental music, in visual arts, and in the academic disciplines of English/language arts, natural science, mathematics, and social science.

Emphasis in Area I is placed on participatory learning experiences which prepare students to enter and understand the critical systems that bind the various fields of study together. To achieve this, students examine new and often controversial theories, techniques, and works - all designed to challenge them to develop a critical stance based on careful scrutiny of ideas and developments within their areas of interest.

Stacey Key coordinates Area I Academics and Tom McDonald coordinates Area I Arts.

(L to R) Row 1: Phillip Spivey, Mark Elrod (Coordinator), C.J. Sentell, Andy Kelso

Row 2: Natasha Murray-Norman, Michael Simeone, David Scott Cunningham, Kathleen Babcock, Adam Frank

The Area II Curriculum is designed to enhance conceptual development. Students are encouraged to learn more about how knowledge is acquired (*epistemology*) and to understand the various ways of knowing in different disciplines. In striving to increase their ability to analyze diverse perspectives on current normative issues, students gain a new appreciation for the implications of those issues. Classroom discussion then leads students to progress toward deeper levels of intellectual reflection, which enhances their ability to become better thinkers.

Mark Elrod coordinates Area II.

Area III is designed to foster the personal and social development necessary for the students to benefit fully from Area I and Area II classes and the cultural and social events of the AGS program. The Area III curriculum provides an opportunity for the students to see the importance of taking responsibility for one's own ideas and participating in a democratic society. Area III provides a forum for actively exploring civic responsibility; it seeks to inspire a student's understanding of his or her own personal potential and impress upon the student the values of character, leadership, integrity, insight, compassion, within their own communities and within society as well.

Within this framework, students explore curricular issues such as theories of intelligence, conflict and stress management, psychological and personality theory, goal setting, and community service. Philip Melton coordinates Area III
